Letter of Motivation for Applying Master's Degree Field of Computer Science at Wien University

Dear Members of the Admission Committee,

I am Mohammad Sharif Rasa, and I am applying for the Master's program in Computer Science at Wien University. I have a good academic background and more than four years of professional experience in the IT field. I believe that this course will further strengthen me with better knowledge and skills and justify my dream of becoming a successful IT professional.

I hold a Bachelor's degree in Computer Science from Ghazni University, specializing in Information and Database Management. I graduated with 75%. During my studies, I learned about computer systems, data structures, databases, and programming. I was particularly interested in courses like data analytics, network security, and software development, and I would like to study them more.

I have worked in different IT roles in Ghazni and Kabul from 2018. I currently work as an IT Support Specialist at Afghan Ghazna Bartar Logistics Services Company in Kabul. I help maintain IT systems, troubleshoot hardware and software problems, and keep the network running. I learned from this experience how to work under pressure and fix problems quickly so that company operations do not get delayed.

I was previously working as an IT Manager for Gulzad Group, managing the IT infrastructure for more than 300 employees. I focused on data security, network availability, and training for employees. This position helped me in leadership skills and how to map IT to business needs.

I have also worked as a Technical Assistant in Ghaznawyan Radio and Television and a Data Analyst in Arya Maskan Construction Company. These roles deepened my technical insight and acquainted me with the way IT works in different industries.

I have practical experience with tools and programming languages such as Java, R, VB.Net, SQL, Excel, and C#. I also achieved the Cisco Certified Network Associate (CCNA) certification, which complemented my network routing and switching abilities.

My objective is to study at Wien University because of its well-known computer science program and research possibilities. I am especially interested in the prospect of learning higher-level courses in network security, data analysis, and

software engineering. I believe your program offers theory along with practical study, which is exactly what I require.

In the future, I would like to help develop the IT sector in Afghanistan by building secure systems and teaching young professionals. I hope that an international and multicultural study environment at Wien University will give me the necessary tools and experience for doing this.

Thank you for your consideration of my application. I would be happy to have the opportunity to study at Wien University and be a member of your academic community.

Sincerely,
Mohammad Sharif Rasa
